RINGMAIN provides an ISO 1219 compliant symbol set for drawing compressed air ring main pipe work configurations.

ISO 1219 supported symbols:

- Manual drains
- Automatic drains
- Compressor inlets
- Drops
- Valves
- Pressure Gauges
- Air Dryers
- Filters
- Lubricators
- Air receivers
- Compressors
- Spurs
- F+R+L
- Outlets
- Regulators

Data exchange via :

- Window's meta-files
- Window's bitmap
- DWG[**] format
- DXF[**] format

RINGMAIN not only allows a plan view as shown above, but also allows section views of pipework layout as shown here.
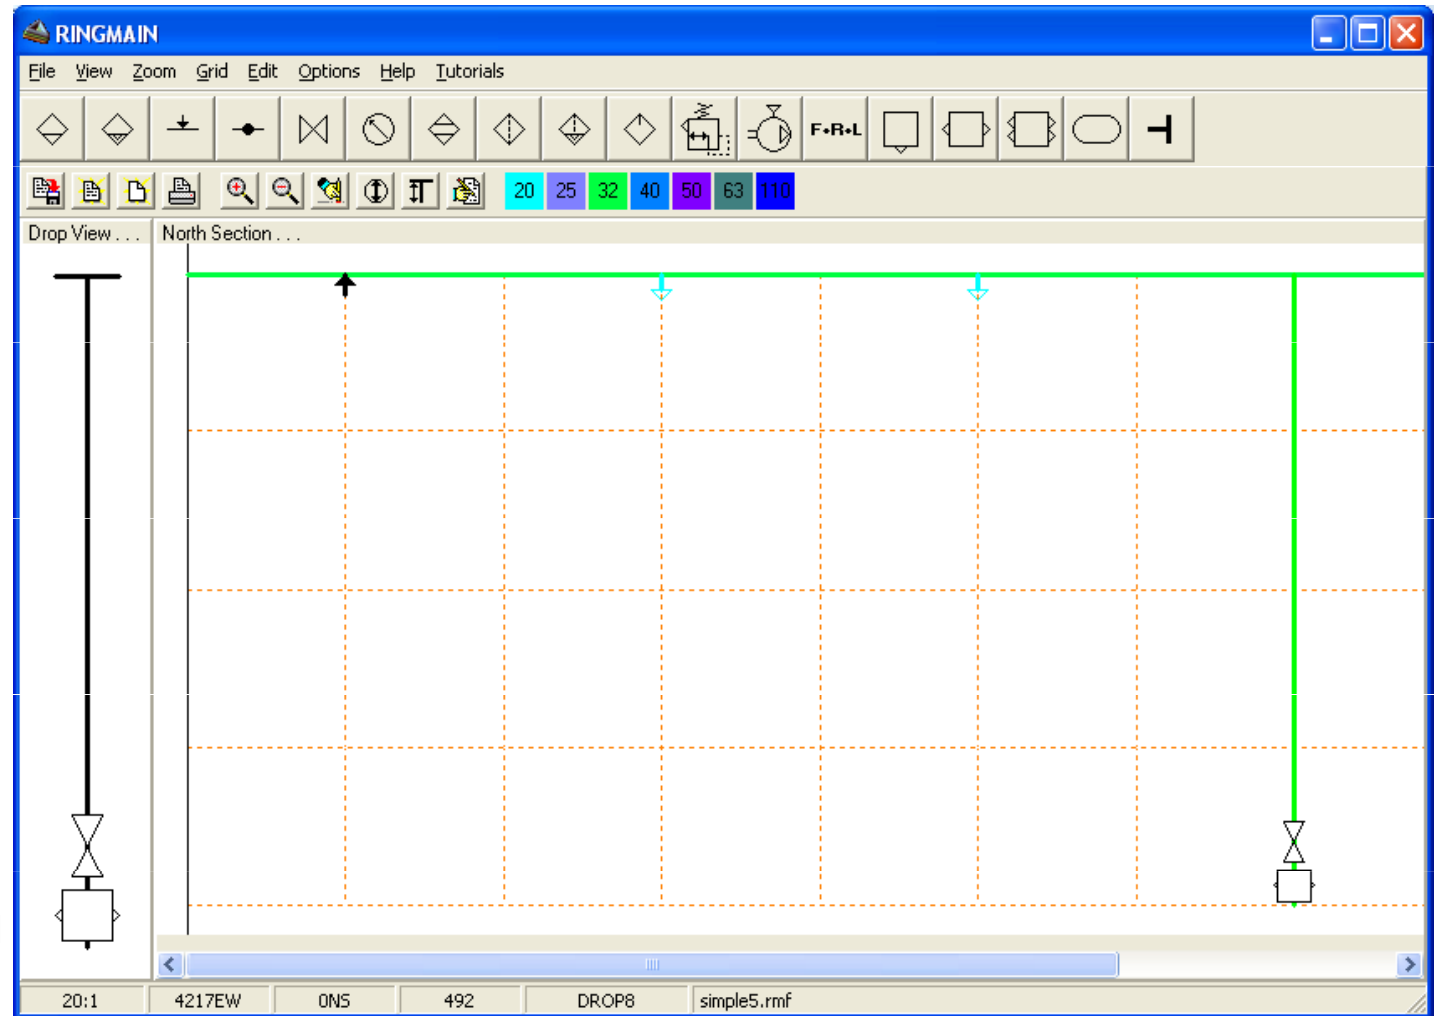

Different pipe work diameters can be displayed in different colours.

Both metric and imperial units are catered for.

Drop views are also available as show here.

The software includes a comprehensive set of tutorials.

When printing the ring main, all drawings are to scale with respect to the pipe work, drop lengths and position of components.

RINGMAIN can be purchased for £295 by contacting S*oftware Workshop*.
Yearly support and updates can be purchased after the first free year for £50 per year.

** These formats are planned future updates, DWG and DXF allow data exchange with AutoCAD and other CAD software.
